WEEKLY MARKET UPDATE

08 Juli – 12 Juli 2024

Dibuat Oleh:
Valbury Research & Development Department

www.valbury.co.id

WEEKLY MARKET UPDATE

- **Indeks Dollar DXY akhirnya terkoreksi setelah sempat menjaga uptrend-nya.** Dimana selama sepekan indeks Dollar (DXY) terkoreksi sebesar -0,92% ke level 104.86.

Pelemahan indeks Dollar disebabkan oleh data ketenagakerjaan, seperti Non Farm Payrolls dan Unemployment Rate yang tidak sesuai dengan konsensus. Selain itu pada FOMC minutes pekan lalu, terlihat bank sentral masih berhati-hati dalam bertindak untuk menetapkan bagaimana tingkat suku bunga selanjutnya, sambil masih terus memperhatikan data - data ekonomi terbaru.

- **Sementara, dari rival dollar, seluruhnya terlihat kompak menguat.** Seperti Euro terlihat menguat selama sepekan terakhir, dengan menguat terhadap US Dollar sebesar 1,17% ke level \$1.08384. Begitu juga pergerakan Poundsterling yang menguat sebanyak 1.34% ke level \$1.28150.

Dengan melemahnya indeks Dollar DXY membuat currency pair perlahan mulai recovery setelah selama ini terbebani oleh tingkat suku bunga yang terus ditahan di level yang tinggi di level (5,5%) oleh The Fed.

WEEKLY MARKET UPDATE

- **Pergerakan harga komoditas pada pekan lalu kompak mengalami penguatan, dimana harga emas XAU bergerak menguat sebesar 2,79% ke level \$2.391.** Begitu juga dengan harga silver XAG yang bertambah cukup signifikan, dimana selama sepekan bergerak sebesar 7,14% ke level \$31.22.

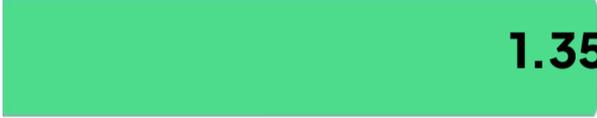

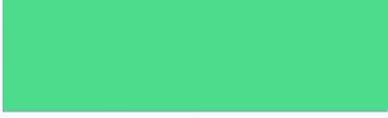

Harga minyak CLR juga mempertahankan uprend nya. Dimana selama sepekan harga minyak menguat sebesar 1,99% ke level \$83.16. Dengan begitu, selama empat pekan terakhir, sudah bergerak sangat agresif, sebesar 10,14%.

- **Pergerakan indeks saham AS juga terlihat kompak menguat.** Dimana indeks Dow Jones selama sepekan terakhir menguat sebesar 0,66% ke level 39375. Indeks S&P 500 juga bertambah sebesar 1,81% ke level 5621 yang merupakan level All Time High nya. **Lalu ada indeks Nasdaq yang positif sebesar 3,48% yang merupakan level ATH nya juga.**

Penguatan indeks saham ditopang oleh data ketenagakerjaan yang terlihat mulai melemah. Dimana data tingkat pengangguran berada di level terendah sejak akhir 2021. Hal ini membuat The Fed harus bertindak Dovish pada dengan segera.
