WEEKLY MARKET UPDATE

Selama sepekan terakhir pergerakan indeks dollar DXY terlihat melemah terbatas sebesar **-0.07%** ke level **101.114**. Pelemahan yang dipicu oleh melambatnya angka inflasi Amerika di bulan Agustus.

Tekanan yang dialami dari inflasi konsumen dan produsen, makin menguatkan terhadap pemangkasan suku bunga Amerika pekan ini. Spekulasi memanas ketika ruang pemangkasan suku bunga The Fed tidak sebesar 25 basis poin (bp) tapi 50 bp. Bila ini sesuai perkiraan bakal menjadi tekanan tajam bagi dolar terhadap rivalitas utamanya. Indeks dolar bisa berada di bawah 100.

Rivalitas utama dolar perdagangan pekan lalu berakhir variatif. EURUSD catat pelemahan secara mingguan 0.10% ke posisi \$1.10719. Tekanan euro datang ketika ECB pangkas suku bunga acuan menjadi 3.65%.

Sementara itu, GBPUSD berakhir flat. Kinerja poundsterling pekan ini akan diuji oleh serangkaian even penting, inflasi konsumen, ritel sales dan rapat BOE. BOE diperkirakan tidak merubah suku bunga. BOJ pun pekan ini akan rapat regularnya, prospek kenaikan bisa saja terjadi dan bisa membawa nilai tukar yen bisa kembali berada di bawah 140 per dolar.

WEEKLY MARKET UPDATE

● **Kinerja komoditas di pekan kemarin menjadi yang paling aktraktif dengan catat hasil penguatan tajam.** Logam mulia seperti emas dan perak terus menguat, terutama XAUUSD yang tembus rekor tertinggi baur \$2585.

Sedangkan XAGUSD tembus \$30.00 dan catat penguatan mingguan paling besar yakni 10%. Sementara itu, harga minyak berhasil pulih dari tekanan 4 pekan secara beruntun. Meski masih di \$68 per barel, harga minyak berpotensi kembali di atas \$70. Potensi pelemahan dolar karena pemangkasan suku bunga menjadi pemicu utamanya. Selain dari peningkatan perburuan aset.

● Indeks utama saham Amerika catat penguatan secara mingguan maupun harian. **Isu terkait Federal Reserve menjadi fokus pasar investor dalam perdagangan saham di Wall Street sepanjang pekan kemarin dan pekan ini.**

Sebab, ketidakpastian mengenai seberapa besar bank sentral Amerika akan memangkas suku bunga pada pertemuan kebijakan moneternya dana kecepatan pengurangan biaya pinjaman dalam beberapa bulan mendatang. Sementara itu, kinerja saham Asia belum cukup mampu mengimbangi penguatan saham AS, karena faktor internal data dan penggerak saham utama.
